SANY unveils Battery-Electric Concrete Mixer Trucks

Chinese heavy equipment manufacturer SANY has recently unveiled a pure–electric version of its truck mixers meant for construction applications. The electric trucks will be formally launched at the upcoming Bauma China 2020 expo scheduled for late November this year.

The company claims that these trucks are not just in prototype, but have been delivered to and commissioned for its strategic partners in China. SANY’s battery–powered solutions will be supporting customers to build up confidence in facing the ever–stringent emission regulations, it adds. The light–weight designed truck is equipped with permanent magnet synchronous motors offering a maximum power of 350 kW and 2,800 Nm peak torque, remarkably outperforming diesel–powered vehicle.

CASE donates medical equipment

CASE Construction Equipment has donated a Blood Tubing Device to the Dhar District Hospital, Madhya Pradesh, as part of its contribution towards creating a safe and healthy society. In addition to this, the brand also handed over a Reverse Osmosis System for water purification and Dialysis treatment to the Chief Civil Surgeon & Resident Doctor of the Dhar District Hospital as a tribute for the services rendered by these frontline warriors.

Commenting on the contribution, Puneet Vidyarthi, Brand Leader, CASE India said, “We at CASE India are committed to assisting our people and helping to further sustain and develop communities. We are delighted to have contributed the equipment to Dhar Hospital as it will help in bringing better medical service to the people of this region and enriching their lives.”
